

SUPPLY & DEMAND ISSUES OF FOOD QUALITY SHIPPING CONTAINERS

LOGISTICS CHALLENGES FOR SHIPPING LINES

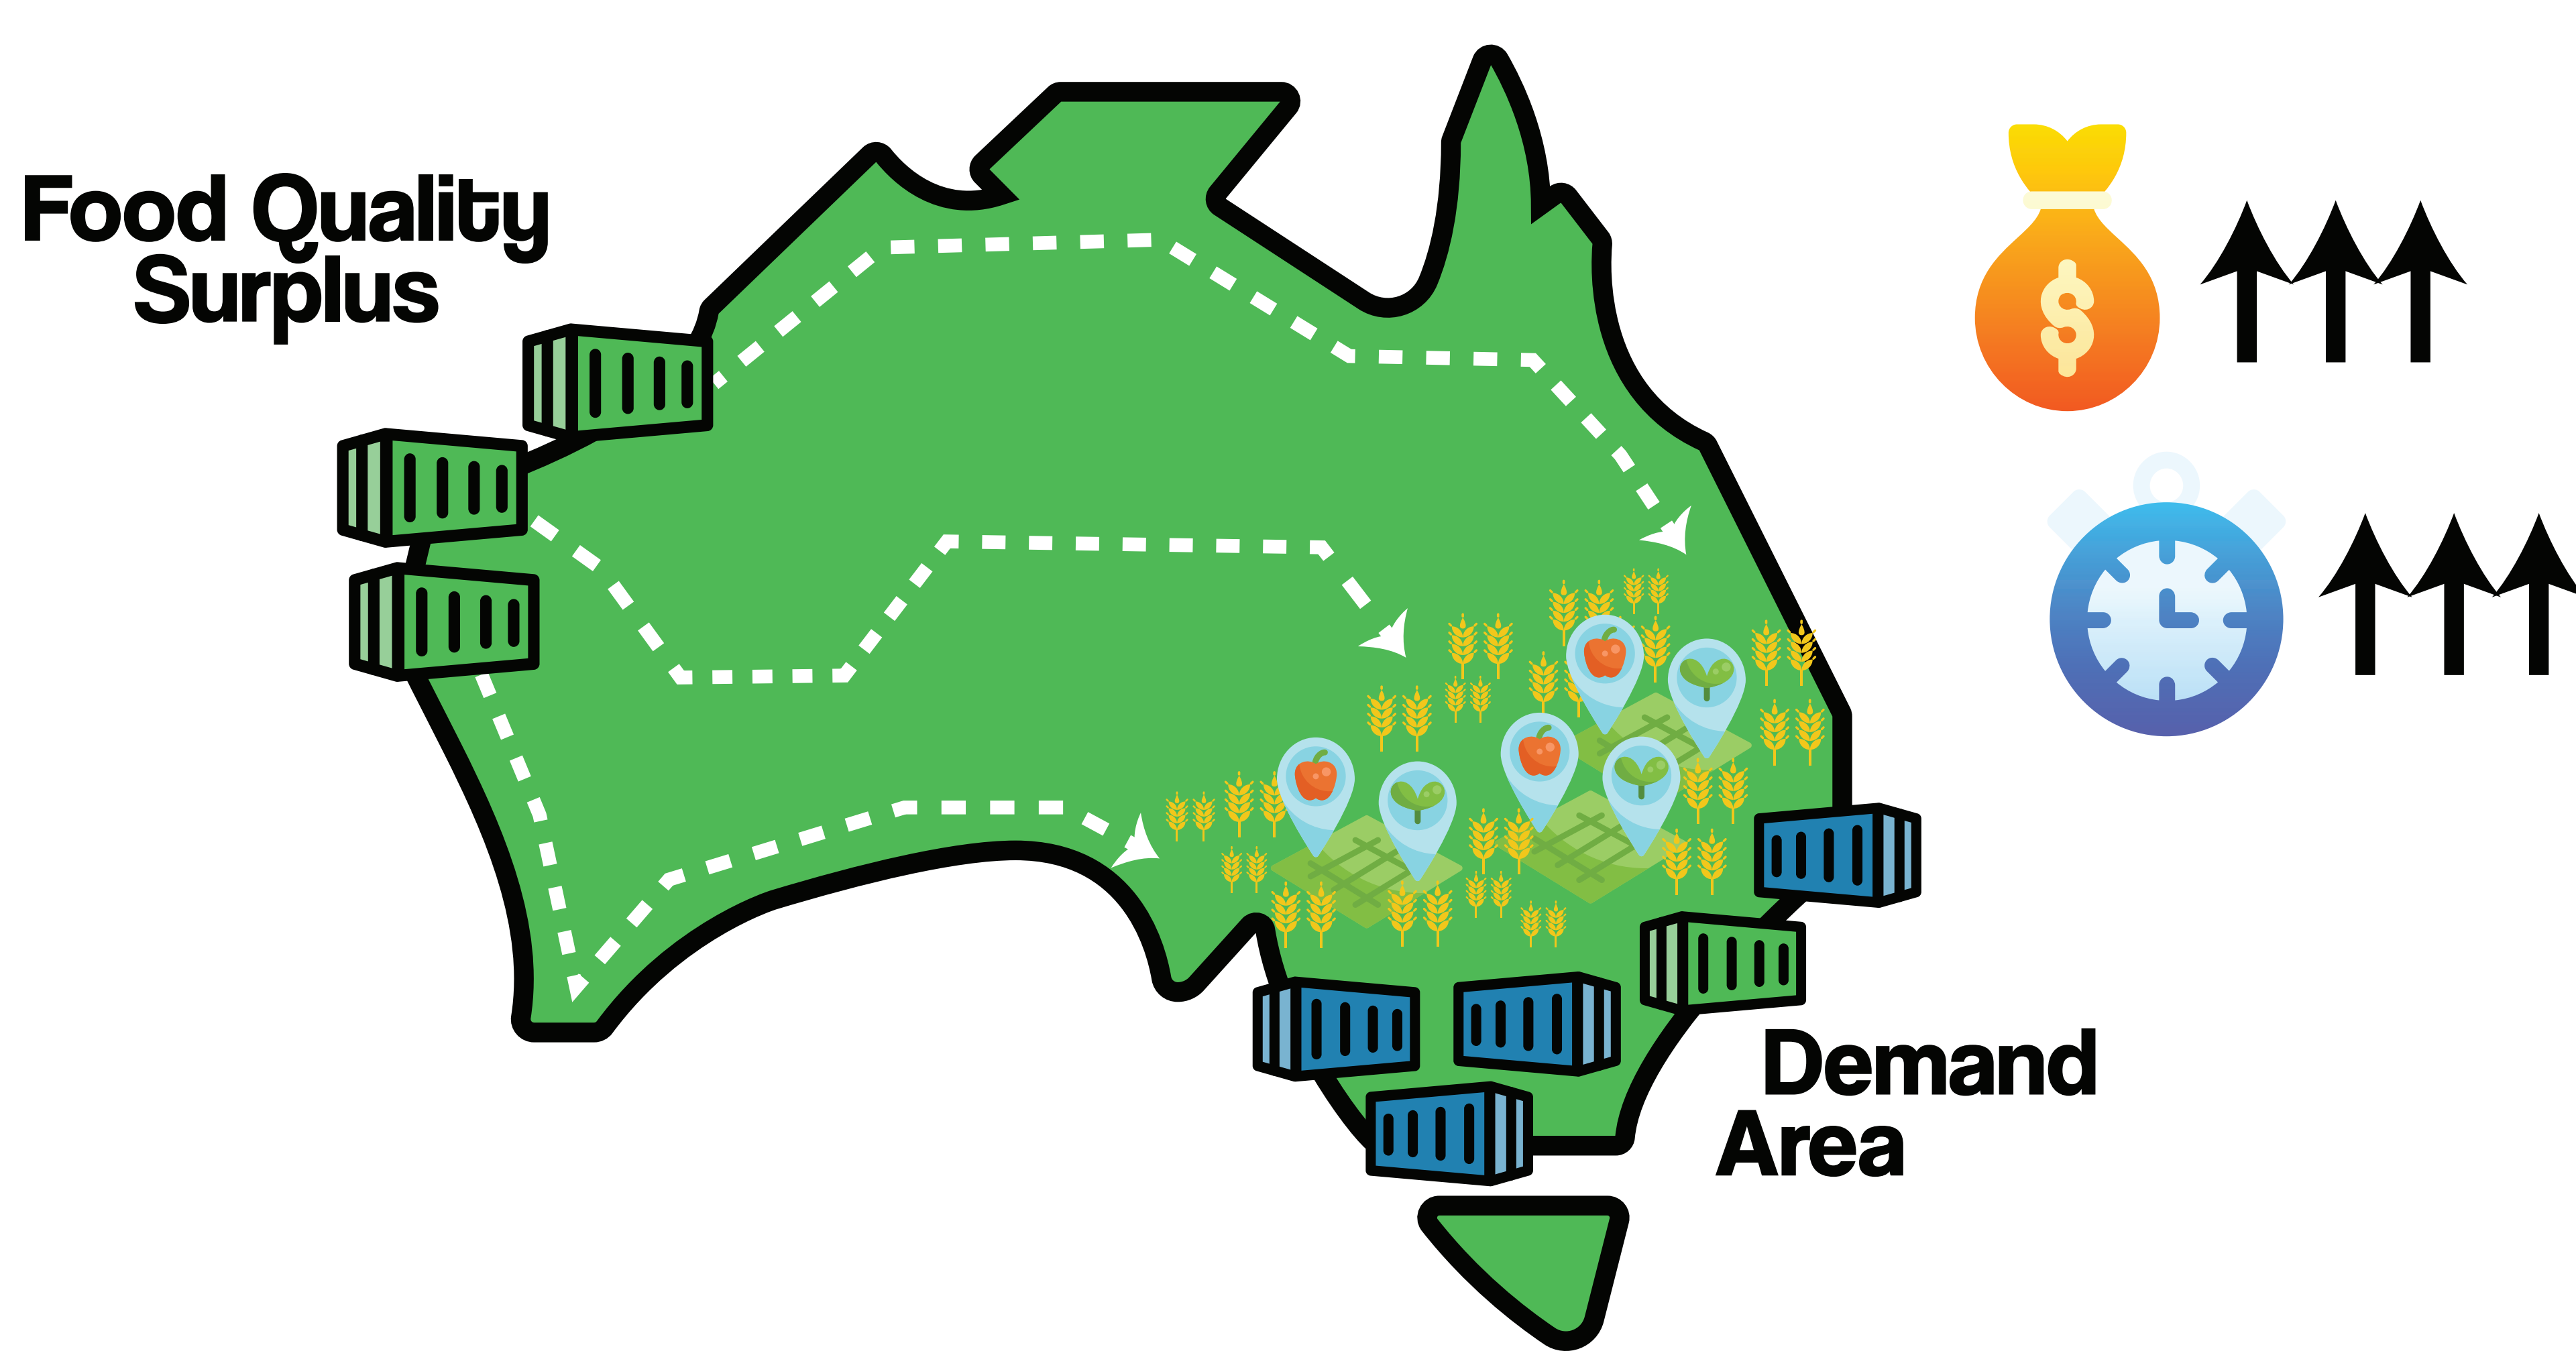

Lots of **General Cargo Containers**

Not Many **Food Quality Containers Available**

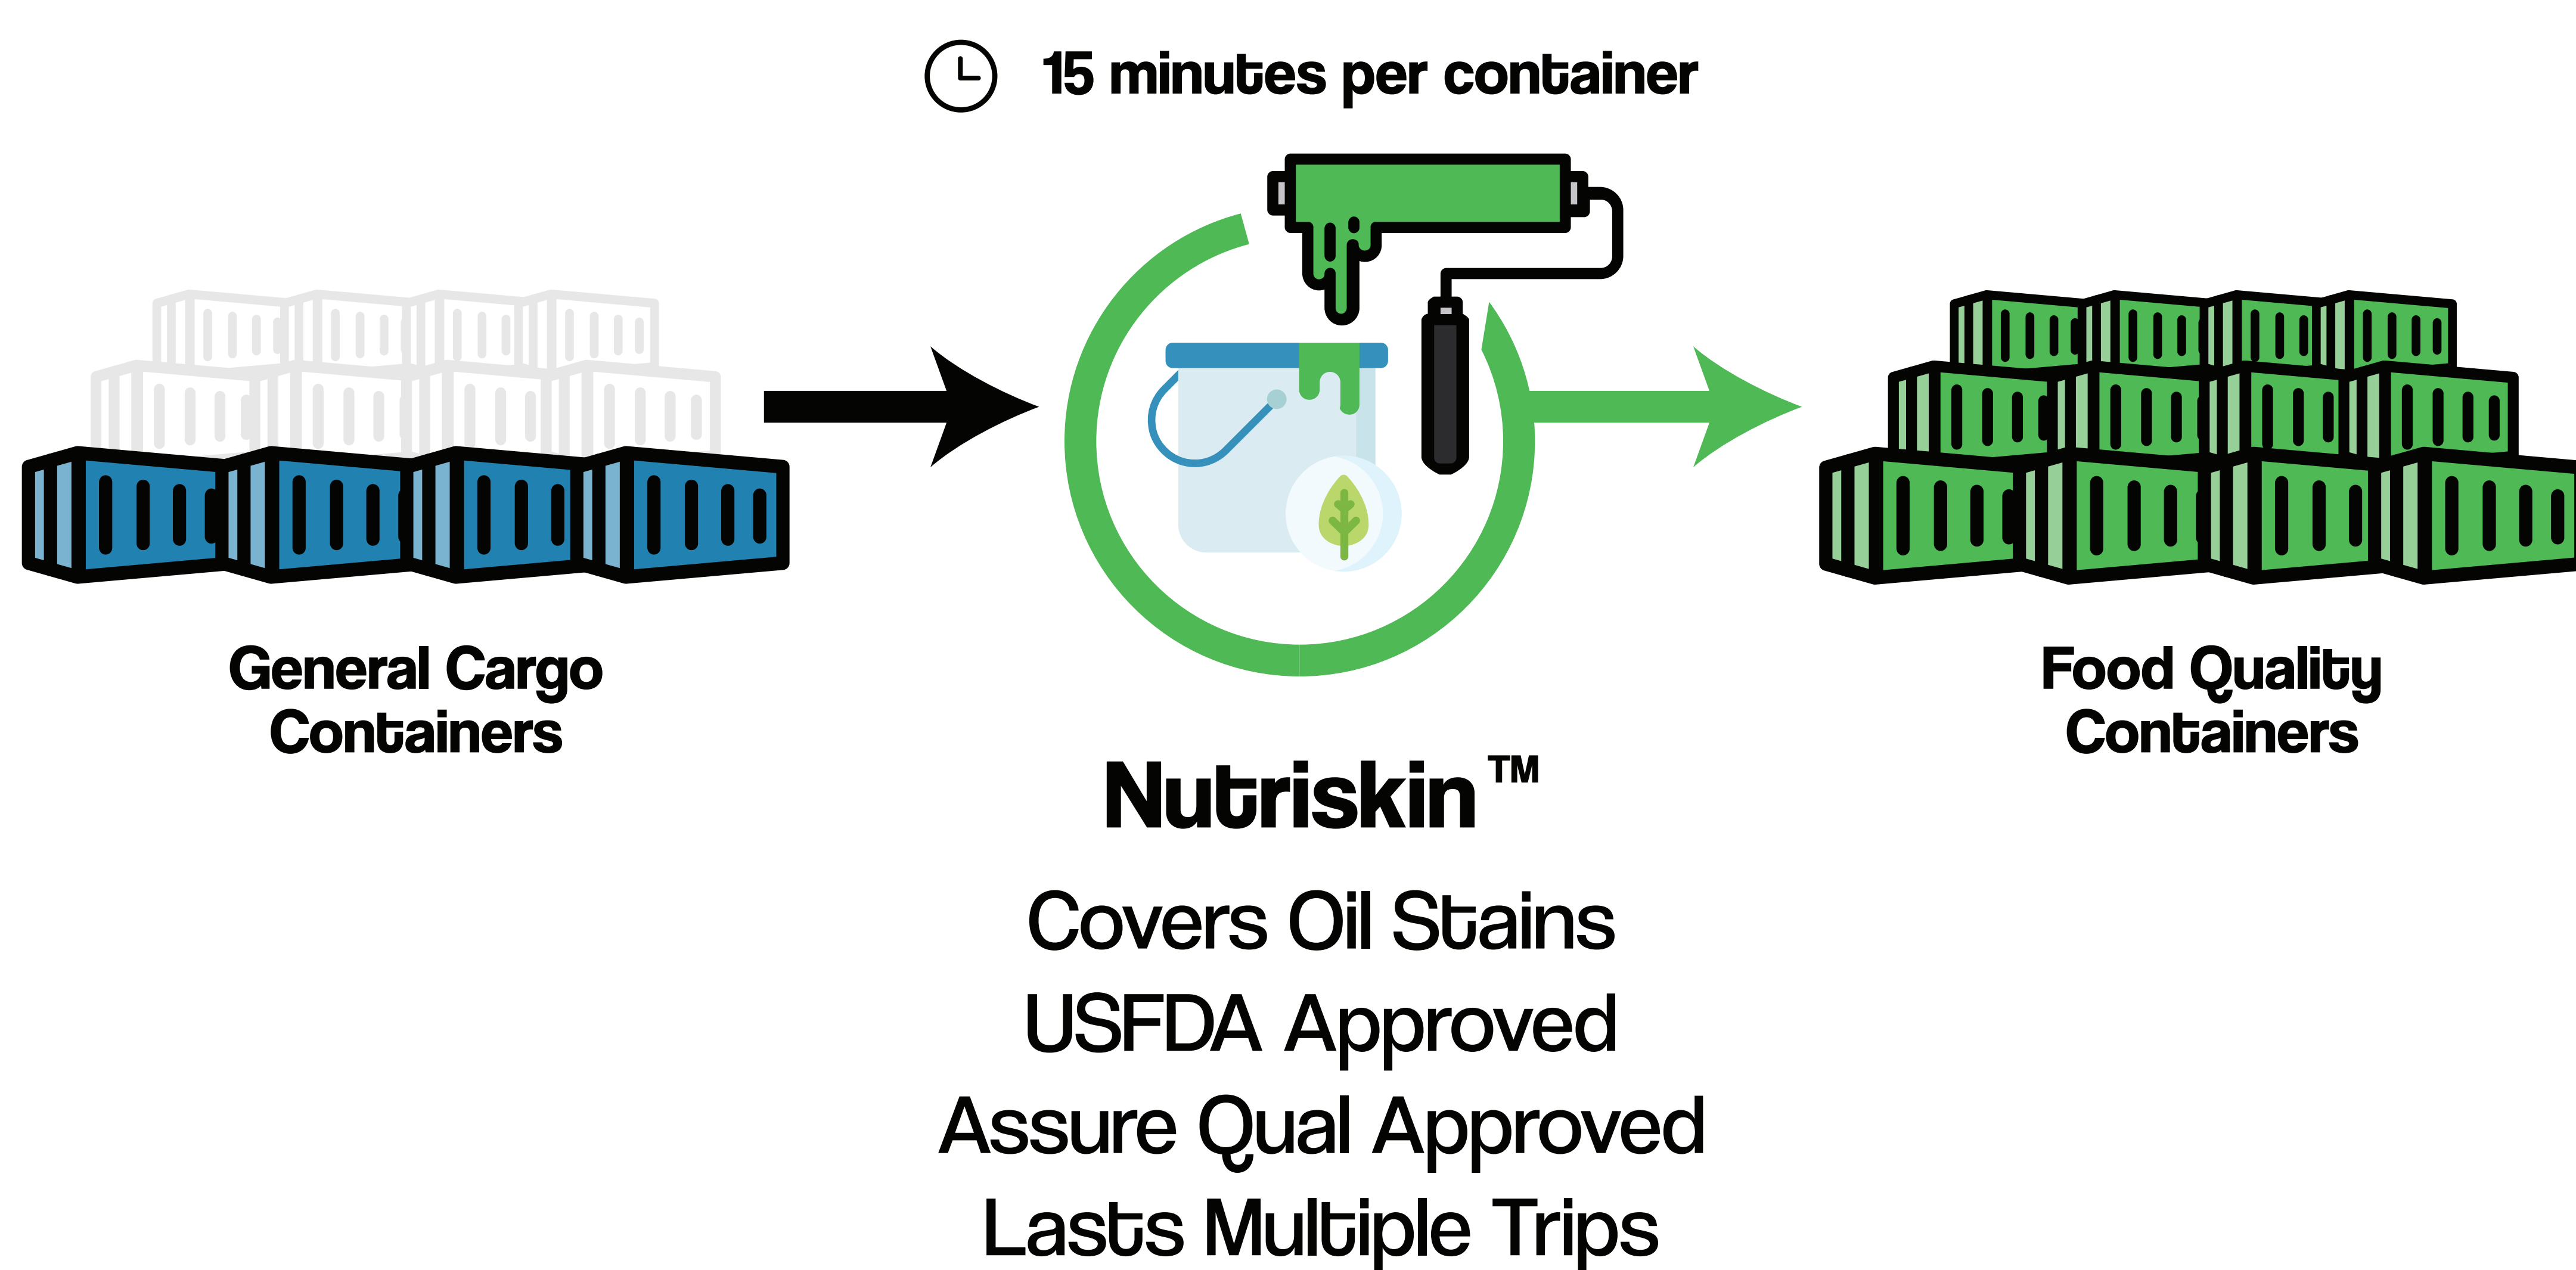

Traditionally, shipping lines will **reposition food quality** boxes from other locations to **where demand is**. This imposes **extra costs** on shipping lines and **can take too long**.

Alternatively, shipping lines can get **Empty Container Parks** to upgrade **general** cargo containers to **food quality**, this is traditionally **expensive**.

SOLUTION

Upgrade surplus general cargo containers where the demand for FQ is to **food quality** using **Nutriskin™**

BENEFITS OF NUTRISKIN™

- Covers Transferrable Stains
- USFDA Food Contact Approved
- Assure Quality (NZ) Approved
- Meets Dept of Agriculture, Water & Environment Food Container Requirements
- Meets Shipping Australia Guidelines for FQ Boxes
- Takes **less than 15 minutes** to apply to container floor
- Pre-measured kit so no wastage or time lost pre-measuring

COST SAVINGS

- Reuse general containers where demand is no additional freight costs of repositioning
- No lift & load charges to reposition empty containers
